## BETTY F. HOLMES

*"A sight to dream  
of, not to tell!"*

This heavenly creation looks like a beautiful lingering memory—and who can photograph a memory? Betty F. Holmes is too delicate, too lacy and too dream-like to be properly pictured. Just try to imagine a flower many, many times more beautiful than the picture. You can't over-do it, so go the limit. Huge size,

Plant Phlox 18 inches apart in good rich garden soil; sun; ordinary moisture requirements.

You will welcome Bright Eyes and Sonja, and you will want them, too, so that your garden will be prettier than your neighbor's. Here are the pictures and descriptions. Better order early and be sure of getting yours.

## SONJA

Baby Blue with straw color eyes—an oddity yes! But oh, it's a pretty oddity! It will add beauty as well as individuality to your garden. We've done the best we can to show Sonja's unusual color, but light colors are hard to reproduce accurately, and so we fall short of perfection. You will have to try it to know it. Somewhat low-growing, 18 to 24 inches, but healthy and vigorous; large florets. Place Sonja out in front. It is a real headliner.

PRICES: 45c each; 2 for 80c; 3 for \$1.15; 4 for \$1.50.

## BRIGHT EYES

The first year Bright Eyes sold at \$1.00 per plant. This year we offer you 3 for \$1.15. There have been red Phlox before, but none with the beautiful large florets, and dancing dark eyes of Bright Eyes. And, we can say, too, none with quite the amazing brilliance of coloring. Oh, what a glorious sight a bed of Bright Eyes is! You should see the row after row of them blooming in our nursery. Why not transplant a part of this striking glory to your own garden? Bright Eyes is a child of the famous large-flowered Daily Sketch and inherits all the health and vigor of its parent, and—the huge florets, too. It is magnificent in size, magnificent in color.

Here is something really new for your garden. Do not miss it. Order early. PRICES: 45c each; 2 for 80c; 3 for \$1.15; 4 for \$1.50.

# TRADE MARK Azaleamums

Plant Azaleamums in the fall, and they will start quick growth in the spring, and become larger, more beautifully-flowered plants by early fall, perhaps even in July.

Azaleamums belong to the Chrysanthemum family but have a habit of growth similar to that of Azalea, hence are trade-marked Azaleamum.

## FIELD-GROWN PLANTS

For fall planting we furnish strong, healthy, field-grown plants that can be easily brought through your winters, ready to grow vigorously in the spring. Order in the fall, and have your planting done.

## 6 Beautiful Colors and Types

The picture shows the beautiful plant, with its hundreds of blossoms. Below are the varieties.

**AZALEAMUM, GOLDEN WONDER.** (Plant Patent No. 368). Beautiful golden yellow.

**AZALEAMUM, CAMEO QUEEN.** Flowers open a deep orchid-pink, then change to a light orchid with creamy center, finally salmon-pink with yellow center.

**AZALEAMUM, BRONZE BEAUTY.** (Plant Patent 205.) Flowers open warm, rich red-bronze, then turn bronzy yellow with bronzed-red center; later, a beautiful golden shade.

**AZALEAMUM, MAGIC WHITE.** (Plant Patent 204.) Blossoms first open a very delicate pink, later turn white with faint yellow center.

**AZALEAMUM, SANTA CLAUS.** Somewhat taller than the others. Flowers deep red, with bronzy yellow center.

**AZALEAMUM, DEAN KAY.** Somewhat taller than other varieties. Flowers beautiful permanent pink. Does not fade in color.

### **HARDY!**

All Azaleamums are very hardy—live through hard winters. All are healthy—seldom are they affected with a disease. All are vigorous growers.

### **PRICES**

Any variety listed above,  
field-grown plants.

1 for \$0.85    3 for \$2.35  
2 for 1.60    4 for 3.10

Usually Azaleamums start blooming in August; often they start in July; by September they should be completely covered with blooms, and you will be even more sure of early blooming if you plant in the fall.

# Now You Can Plant Azaleamums in the Fall!

You will have no difficulty in getting fall-planted Azaleamums to live through the first winter. Simply be sure to prepare an adequate piece of ground. A piece at least 2½ feet across should be prepared for each Azaleamum. Then plant as you would any other perennial, and after the ground is frozen, mulch well with some good strawy material. The farther north you are, the heavier you should mulch. Eight to ten inches of mulching material is not too much for the northern states. Remove the mulch in the spring when the buds open on the trees.

Azaleamums belong to the Chrysanthemum family, but have a peculiar habit of growth similar to that of Azalea, hence are trade-marked Azaleamum. They are not related to Azaleas.

The word must not be in selling plants the varieties be propagated

Tell your friends that you have Azaleamums, and maybe they will say: "Oh, we have those, too!" But if you have Summer Sunset and Summer Gold, you will have a reply for them: you can say: "Yes, but mine are the new ones, and are they beauties!!!"

Summer Sunset and Summer Gold are not simply new colors.

They belong to a new race of Azaleamums, with large flowers; stronger, more upright stems; better, non-fading colors; and bouquet-type blooms. You can cut many beautiful bouquets from your Summer Sunset and Summer Gold, and hardly notice the loss to your garden. That's because there are so many on each plant that they literally fall over one another. Cut one,

and another drops in place to cover the vacancy. In short, they have all the good characteristics of the original Azaleamums plus a lot of extra-good points of their own. They are described at the right below.

### HARDY

All Azaleamums, including Summer Sunset and Summer Gold are hardy perennials, and normally will live through your winters. They are vigorous and easy to grow, and produce blossoms by hundreds over a long blooming season.

**PRICES: 1 for \$1.10; 2 for \$2.10;  
 4 for \$4.10.**

## Azaleamum, Summer Gold

Plant Patent No. 598

Azaleamum Summer Gold has large flowers: often nearly 3 inches across or more. Flowers are beautifully shaped and beautifully colored. The older varieties had beauty, yes; they are gorgeous, too, with hundreds and hundreds of blooms; and it almost seems that they could never be improved, but Azaleamum Summer Gold is proof that they can be. Best of all it has beautiful bouquet-type blooms. These blooms look "swell" in your garden, or as cut flowers. Snip them off and put them in a vase; they will be beautiful. You will not miss them from your garden, for they are produced by hundreds, same as Azaleamum Summer Sunset shown at the left.

Summer Gold is more upright than the other varieties, but often one will be so completely covered with the large, heavy blooms that they have to cover the sides of the plants to find room. Order Summer Gold for an amazing glitter of color in your garden.

**PRICES: 1 for \$1.10; 2 for \$2.10; 4 for \$4.10.**

## Azaleamum, Summer Sunset

Plant Patent No. 561

Azaleamum Summer Sunset seems to shimmer and glimmer in the sun like a magnificent jewel. Summer Sunset blooms with a variety of exceedingly rare and rich colors; not a single color alone, but a mixture of colors in a beautiful opalescent effect. No single plant can show the glory of Summer Sunset, because it varies in shade throughout the season. We selected a plant that was predominate in rich orchid. At the same time there were others that predominated in golden yellows and apricots; some that were predominantly orange, and others with a mixture of shades. Summer Sunset is a continual surprise to you. It does not tire you with one color alone, but has a variety of colors, and each is glorious and beautiful.

Its hundred of blooms first appear in August, and continue until stopped by heavy frosts. The newly opening buds are a rich red, giving an amazingly beautiful contrast with the open flowers and dark green foliage. If you want a rare and glorious jewel in your garden, plant this Summer Sunset.
